5. Disclaimer

1. ABSTRACT

- Blockchain technology has been surrounding our environment since 2000s'. Besides the technology of it, the assets can be built on it, called crypto currencies, are heading towards the future and creating a unique financial ecosystem. Thus, both this blockchain technology and the crypto currencies are attracting too many people such as investors, politicians, regulators etc.
- Bridge Ecosystem is a new supportive approach to the crypto assets, and it has been built to support financially the projects in its ecosystem. Bridge Ecosystem has been built by a non-anonymous team.
- Starting from the first presale, the crypto assets in the ecosystem will start to support each other financially. This strategy not only covers to prevent the sudden price drops but also the balanced value rising. The more crypto projects join the ecosystem, the more value of the projects in the chain will be stabilized.

2. TECHNICAL DETAILS

- Bridge Ecosystem is just a contract was built on Binance Smart Chain. It doesn't have any token. Basically, Bridge is a manager that collecting the taxes (%5 from each transaction) from the crypto assets connected to it, buy the tokens of each contract equally and then burn them forever.
- Bridge Ecosystem's smart contract is verified on Binance Smart Chain.
- Bridge Ecosystem's smart contract has been audited by reputable auditor, TechRate.

a. Use Case Example:

Let's say that there are three crypto projects linked to the Bridge contract, and total accumulated tax in Bridge contract is 30.000\$. With this money, Bridge buys these three crypto projects' tokens equally and burn them forever. From each crypto project connected to the Bridge, there will be 10.000\$ equivalent of their tokens bought and then burnt.

3. OUR PRINCIPLES

a. Care the Investors

- To grow and provide the healthiest ecosystem to the investors, it's mandatory for the projects want to join the ecosystem hold an audit for their smart contracts and ran by a non-anonymous team.

b. Provide Financial Stability

- All the crypto projects connected to the Bridge itself are being programmed to support each other financially.

c. Prevent Sudden Dumps

- Due to our "Provide Financial Stability" principle, the projects connected to the Bridge will be less affected by the BTC and BNB volatility.

d. Personal Transparency

- Team of RocketDoge and Bridge Ecosystem is not anonymous. Everyone can reach the team via LinkedIn.

e. Financial Transparency

- For the sustainability of the Bridge Ecosystem project, marketing wallets and the developer wallets for each project in the ecosystem are trackable by everyone.

f. Community Driven Project

- The community will mostly lead the way of the project. For example, the community will be asked to vote to decide for the soft cap and hard cap of the presale which crypto projects will be connected to the Bridge Ecosystem.

4. ECOSYSTEM

- Bridge Ecosystem smart contract was coded in Solidity programming language and launched on Binance Smart Chain. Reason why BSC ("Binance Smart Chain") has been selected as an environment is that BSC is a way faster and has lower transactional fees than ERC-20 ("Ethereum") chain.
- Most and the unique part of the Bridge Ecosystem is that it has its own Ecosystem. The coded smart contract has some security and process criteria.

a. First Coin on the Bridge Ecosystem: RocketDoge

- RocketDoge has been launched at 28th of May 2021. The presale amount was 300 BNBs and all sold in 9 minutes. Community and the team are trying hard to rise the value of RocketDoge. It's been listed on CoinGecko cryptocurrency information website and Coinsbit Exchange Platform. Next step for RocketDoge is to get listed on CoinMarketCap. (Latest update: 23 Jun 2021)
- Bridge Ecosystem is the main product of RocketDoge. Also, RD is also connected to the Bridge Ecosystem. RocketDoge is a basic token but what makes RD valuable is that it doesn't charge tax from the transactions.

5. DISCLAIMER

All information provided in this whitepaper, website (<https://bridge.eco>) and Bridge Ecosystem communities is provided solely for educational purposes and should not be perceived as financial advice. Trading cryptocurrencies/digital assets is a high-risk, high-volatility activity. The readers of this whitepaper should never put more resources into cryptocurrency buying than they can stand to lose.

Before investing in this or any other cryptocurrency project, the reader should always seek professional investment advice.
